

MCI LEADING IN INTERNATIONALIZATION

**The Entrepreneurial School® is one of Austria's most international universities
| High student mobility | 280 partner universities | 16 double degree programs**

It was with great pleasure that the MCI received the latest Austrian university statistics, which were published a few days ago. The data for the academic year 2018/19 published by the Ministry of Science confirm that the Entrepreneurial School® in Innsbruck is one of the most international universities in Austria.

© MCI

With 1,430 exchange students going abroad to one of the 280 partner universities of the MCI (outgoings) for a semester or year, or coming to the MCI from these universities (incomings), the Entrepreneurial School® achieves a mobility rate of 44.7 %, placing it among the top-ranking universities in Austria. Despite its manageable size (3,196 students in 2018/19), the MCI surpasses even institutions which in absolute numbers are disproportionately larger.*
