

# Social Work Platform Tyrol

## Brief Overview

The “Social Work Platform Tyrol” connects academia and practice to develop joint solutions, create synergies, and enhance social work's visibility.

### 1. NETWORK MEETING – APRIL 25, 2024

Kick-off of the “Social Work Tyrol” Platform at MCI: In a fishbowl and open-space session, key topics were identified—visibility of social work, stronger links between practice and MCI, decentralization, and a critical/professional stance. Next steps were agreed upon, including forming a core team, establishing regular exchange formats, and conducting joint research.

### 2. NETWORK MEETING – APRIL 3, 2025

Since the kick-off, a core group (Practice + MCI) has been established, goals and a structural paper have been agreed upon, and planning for 2025 has begun. Projects and priorities were defined at four thematic roundtables: a master's project on a graduate survey, practice-oriented research with a “theme bazaar,” future topics in social work 2030 (budget, skilled workers, complexity), and making research visible.
