the internet of things.

ANDREAS KÖNIG

CEO, TeamViewer, Göppingen/D

Launched in 2005, TeamViewer focuses on cloud-based technologies to enable online support and collaborate in real time across the globe. Remote support, remote access, and online collaboration are helping people, integrating technology into our daily lives and creating new ideas.

TeamViewer has been installed on over 1 billion (!) devices, creates 750,000 new IDs every day and has over 20 million devices online at any given time.

Andreas König has served as the Chief Executive Officer of TeamViewer since May 2015. Known for being driven and resilient, Andreas previously served as a member of the Swisscom Ltd Executive Board and Chief Executive Officer at Swisscom IT Services, where he successfully merged two business units into a single entity with over 4,500 employees.

From 1996 to 2012, Andreas König held leadership positions at NetApp, a leading American provider of storage solutions and data management. As Senior Vice President and General Manager EMEA, he was instrumental in the company's establishment and expansion within the European market. Under his leadership, this business grew to over 2,000 employees and generated annual revenues of about 2 billion dollars.

Andreas König studied Mechanical Engineering at the ETH Eidgenössische Technische Hochschule (ETH) in Zurich.

Free participation for members of MCI Alumni & Friends and invited guests. Please register at alumni@mci.edu.
